Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

It is noted that a restriction was presented in a prior phone conversation and election was made with traverse. Upon reconsideration, the restriction has been reformatted and accordingly the new restriction requirement is presented herein.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, 26 and 28, drawn to a method of monitoring substance administration, classified in class 128, subclass 898;

Group II, claim(s) 12-25 and 27, drawn to an apparatus for storage and use of an administrable substance, classified in class 235, subclass 375;

Group III, claim(s) 29-31, drawn to a package of an administrable substance, classified in class 206, subclass 527;

Group IV, claim(s) 32 and 33, drawn to a coded syringe, per se, classified in class 604, subclass 187.

Art Unit:

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: it is clear from the prior art references submitted in paper No. 4, such as Claeys et al, US Patent No. 4,853,521, that the special technical feature, a coded site to assist in substance administration, which links the above groups, is not patentable and therefore restriction is appropriate.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Troy Arnold whose telephone number is (703) 305-0621.
